

## Past Conference Report: Analytical Chemistry 2020

DAVID Vasile

University of Bucharest, Romania

Analytical Chemistry 2020 is well-satisfied to invite all of you to the “12<sup>th</sup> World Congress on Analytical Chemistry and Instrumentation” booked for **October 19-20, 2020** in **Rome, Italy**.

Analytical Chemistry Congress, the gathering gives increasingly engaged sessions like symposiums, lectures, workshops on an assortment of themes, publication introductions, and different programs for members from everywhere throughout the world.

The Conference tackles up to give you the chance to meet and communicate with leading scholars, researchers, friends, colleagues, sponsors, exhibitors, and undergraduates over the globe to pass on a general gathering for the announcement of interesting examination results, new discoveries, and utilitarian change understanding. The theme of Analytical Chemistry Congress is “Advancement and upgradation in the field of Analytical Chemistry and Instrumentation”.

Analytical Chemistry 2020 unites the participants from the scientific community who has contributed well in the field of Analytical Chemistry and Instrumentation.

Analytical Chemistry Conference is two days of oral and poster sessions, keynotes, social events, and workshops in the beautiful city of Rome, Italy from Oct 19-20, 2020. It will address all these critical subjects with suitable solutions and will dissipate the knowledge so that each and every individual across the globe gets the profit. Hold hands with Analytical Chemistry Conference to connect with the noble's peers, exchange knowledge, and experiences, and upgrade yourself with the latest information to take your research to the next level. We are excited about the outcome and hope that you will find this congress fruitful, enjoyable and worthwhile.

Analytical Chemistry 2020 gives a stage to set up and outfit their insight past the recognized scholastics in the field of Analytical Chemistry by drawing in with look into research scholars, scientists, industry researchers, public health professionals, Research laboratories Scientist.

The principle point of this meeting is to give enhancement to their new thoughts and to think about the progression in the field of Analytical Chemistry and related subjects. In demand sectors of the economy's wider industry have, in line with the country's growth, also enjoyed high rates of growth. In a recently discharged report from Solidiance, titled ‘new chemical era in china’, the firm explores, however, the delay within the Chinese economy could return to have an effect on the chemical market in the country and globally. The report provides some key insights into how the global market is faring, as well as a projection for the global market to 2020.

Italian market ranks even second in Europe for many products. The country can take advantage of its Mediterranean position at the center. Because of these reasons, many chemicals owned foreign companies have decided to place their strategic basis here for operations in Southern Europe to be controlled.

### Benefits of attending the conference:

- Abstract publication in our Journal with unique DOI number
- Acknowledged Abstracts will be dispersed in independent supporting journals.

- All participants can benefit CPD Credits (Continuing Professional Development) by going to our esteemed analytical chemistry gathering.
- Spread your network with world-Class Speakers and scientists and researchers from across the world in the analytical chemistry and instrumentation related fields.
- Live Streaming of your presentation through our sites.
- Lunch during the conference will be provided for free of costs.
- A Certificate will be provided by our eminent organizing committee members (OCM).

### Target Audience:

- CEO's and R&D Heads from Industries
- Eminent Faculties
- Industrial Leaders
- Professors and Students
- Brand Marketers
- Manufacturers
- Research laboratories Scientist
- Business Delegates
- Advertising Agency Executives

### Conference Highlights:

- Bio-analytical Methodology
- Applied Chemistry
- Green Analytical Chemistry
- Polymer chemistry and Material Science
- Advanced Organic & Inorganic Chemistry
- Analytical Biotechnology
- Radio-analytical Chemistry
- Biopolymers and Biomaterials
- Pharmaceutical Chemistry
- Instrumentation, Control, and Automation
- Data Communication Links
- Robotics and Mechatronics
- Biochemistry
- Nuclear Chemistry
- Computational Chemistry and Chemical Engineering
- Industrial Chemistry
- Agricultural Chemistry

12<sup>th</sup> World Congress on Analytical Chemistry and Instrumentation, Rome | Italy | 19-20 October | 2020
