

Past Conference Report

“11th International Conference on Otolaryngology: ENT Surgery” was successfully done on **July 21, 2020** webinar hosted by Allied Academies with the theme of “**Explore and Emphasize the Innovations of Otolaryngology**”.

Otolaryngology 2020 was marked with multiple sessions, keynote presentations and panel discussions. We received active participation and generous response from organizing committee members, scientists, young and brilliant researchers, business delegates and talented communities who made this Conference as one of the most successful and productive events in 2020 from AAC.

The meeting was carried out through various sessions, in which the discussions were held on the following major scientific tracks:

COVID-19

Otolaryngology

Otology/Neurotology

Tracheostomy

Audiology

Facial Plastic and Reconstructive Surgery

Implant Applications for ENT Disorders

Rhinitis | Allergy

Sino nasal Disorders and Surgical Treatment

Hearing Impairment and Deafness- Causes and Treatment

The conference was initiated with the Excellencies of the keynote forums:

Title: Past, present and future directions and rational approach in reconstruction of head and neck cancer

Chala Andres, Caldas University, Colombia

Title: Role of lymphoscintigraphy and SPECT-CT in sentinel lymph node detection in early stage squamous cell carcinoma of oral cavity: Our experience

Jaimanti Bakshi, PGIMER, India
