

Potpourri of skin issues in pediatrics...new ideas

Vita Boyar

Northwell Health, USA

Abstract

This presentation will review variety of pediatric skin and wound care intricacies and challenges. It will familiarize the attendees with safe products and approaches through presentation of the real-life cases, concentrating on common pediatric and neonatal cutaneous conditions mixed with unusual but difficult to treat ones.

Biography

Vita Boyar, an associate professor of pediatrics at Zucker School of Medicine, at Hofstra Northwell is a neonatologist and a certified wound specialist physician, practicing both neonatology and wound care at Cohen Children's Medical Center of NY, where she developed and directs Northwell Neonatal Wound Service. Boyar is a board member of International Society of Pediatric Wound Care and a member of Society for Pediatric Research. Her research interests include antimicrobial products in neonatal population, skin maturation, point-of-care ultrasound in wound care, as well as safe neonatal skin care. Boyar is a creator and author of monthly pediatric column at Wound Management and Prevention Journal, "Children with wounds, asking the right questions".
