Description

The present invention related to reduce the unbearable cancerous pain and its inflammation of any part of the body within a few minutes only after external application.

This invention is related to the development of scientific poly-herbal formulation in nano-diluted form that will useful in the management of unbearable pain of cancer patients, already test in hospitals with regulatory approval.

Novel feature of the invention

- This medicine is purely plants oriented. Due to plants oriented the availability of raw material for the preparation of this medicine is very easier worldwide. This is highly effective on cancerous pain. The preservation process of this invention is very easy. Because of its distilled water base mix with 2% Rectified spirit.
- This present invention can be used externally and internally and both at the same time. Due to multiple types of using process, the application of this medicine is very easy for any types of patient suffering from cancerous pain.
- From its unique preparation process, all types of negative aspect of plants have removed and all positive and active substances of the plant have collected and used. Due to this, it has no any side effect on healthy body.
- Lab test (Ana laboratories, Mumbai) has declared that there has less heavy metal which is within permissible limit. Due to this reason this medicine is absolutely safe for human being.

The extracts of identified plants were grouped with a certain proportion. These created groups and some single plants extract again combine with certain proportion to get this poly-herbal recipe.

The individual plants extract were recorded and tested and placed in different group based on their activities with specific ration 5%, 10%, 20%, and 25% so on to prepare the specific groups. Now these prepared groups are combined together with a specific ration 5%, 10%, 20%, and 25% so on and also combine some single plants extract with specific ration 10%, 5%, 25%, and 30% to prepare this unique mix.

The final formulations were tested in different *in vitro* and animal models as well as on selected cohort of patients under strict regulatory guidelines of CDRI Lucknow.

Experimental details/testing results

This medicine used of several types of cancerous pain like jaw cancer, throat cancer, liver cancer, uterus cancer, penis cancer. Application of medicine is external or internal or both way. The testing result in all cases is within 7 minutes to 30 minutes. The pain reduced 40% to 100% (patent opinion).

Use/function/industrial application

Application of medicine is external or internal or both way at the same time. At the time of external use, the affected body part where cancer appears must be wet by medicine properly at least 10 to 15 minutes continuous. After applying medicine cancerous pain is going to reduce. The function of the medicine through lymph, that's why it works like electricity.

At the time of internal use, 5 to 10 drops with 1 cup taped warm water 3 or 4 times a day or as directed by physician.

Re-apparent of the pain is depending upon vitality of the patient. The pain might be reducing for less time or for long period. But when patient feels pain again, the repetition of the medicine might be occurred.

Advantage

The methodology use to prepare this invention make it totally non-poisonous and works like miraculous to reduce the unbearable cancerous pain and its inflammation. It has no any side effect on healthy body.
