Short Note on Skin Graft and Cosmetic Procedure

Akhila Sabbineni*

Abstract

Aesthetic medical specialty is treatment for the skin, hair or body that's meant to boost the looks of a patient. it's medical specialty that's targeted on enhancing appearance rather than eradicating sickness.

Dermatology could be a branch of medication that deals with the skin and diseases of the skin. It issues the study, analysis and identification of traditional skin and disorders of the skin. Cancers, cosmetic and aging conditions of the skin, fat, hair, nails and oral and venereal membranes square measure all aspects of medical specialty.

Keywords

Anesthetic; Scars; Dermatology

Introduction

Aesthetic medical specialty could be a new and unambiguously completely different medical specialty observe, setting a regular for cosmetic medical specialty in Asian country. it's a bunch of treatments that square measure wont to improve personal look instead of address AN underlying sickness. Some would possibly argue that a couple of treatments that square measure classified as "cosmetic" are literally medical in nature, like procedures for skin condition. the various sorts of treatments coated beneath aesthetic medical specialty square measure chemical peels, wrinkle fillers, microdermabrasion, liposuction,

enhancements, and optical maser resurfacing. Aesthetic dermatology's primary purpose is to boost a person's appearance by reducing or eliminating imperfections. the bulk of those imperfections square measure associated with the skin, especially the face, whereas a couple of treatments address the nails, scalp and hair.

The dermatologist must be both probing and empathetic. Many patients, especially older ones, are ashamed that they look older than their peers, but may be too ashamed to talk about it directly. Most of these patients do not know the range and versatility of aesthetic outpatient procedures offered today and may have the erroneous impression that there is nothing that can be done to address their concerns.
