

Treatment of Chronic ear infection with Polyposis

Dunja Milicic

Hospital da Luz Arrabida, Portugal

Abstract

In elderly patients, with high risk of morbidity and mortality, a surgical procedure should not be the first option in treatment of chronic ear infection with polyposis. An alternative conservative attitude is offered, by use of low-dose of immunomodulation therapy..

Biography

Dunja Milicic graduated at Medical School University of Zagreb in 1984.

1988 Master of Science degree in Otorhinolaryngology, Maxillo-facial Surgery, Audiology and Phoniatics by School of Medicine University of Zagreb, Croatia.
